

# ViVo Mouse™

THE VORTANT VIDEO AND VOICE MOUSE

HANDS-FREE CONTROL  
of YOUR COMPUTER

## AN EXCITING NEW WAY TO OPERATE YOUR COMPUTER

The ViVo Mouse™ is a state of the art head tracker that works with a standard webcam to provide complete hands-free control of your PC. The ViVo Mouse accurately moves the mouse pointer by following the motions of your head -- or listening to your voice.

## OPENING THE WORLD

With the ViVo Mouse, you can do whatever you want: explore the web, read and write e-mail, create documents, play games, and manage your computer.

With your voice or by moving your head you have full control of the mouse: single click, double click, right click -- even drag and drop.

Based on years of research, including funding from the National Institutes of Health (NIH), along with frequent evaluation by users and feedback from instructors, the ViVo Mouse can address your needs in many settings.

## SUPPORT

The Vortant technical support staff is ready and able to provide excellent help on installation and use of the product. Upgrades are available at no cost for up to one year.

## FEATURES

### Simple to Use

Speak or move your head to precisely control the mouse.

### Smart

Sophisticated software makes it easy to click on tiny objects and complex menus and to perform formerly difficult tasks.

### Fast setup

Calibration is fast and simple.

### Elegant

Uses a standard webcam - no complicated headsets or other attachments are needed.
